

POS Hourly Sales Interface

112 Katong Mall - TP Property (Mall Intelligence)

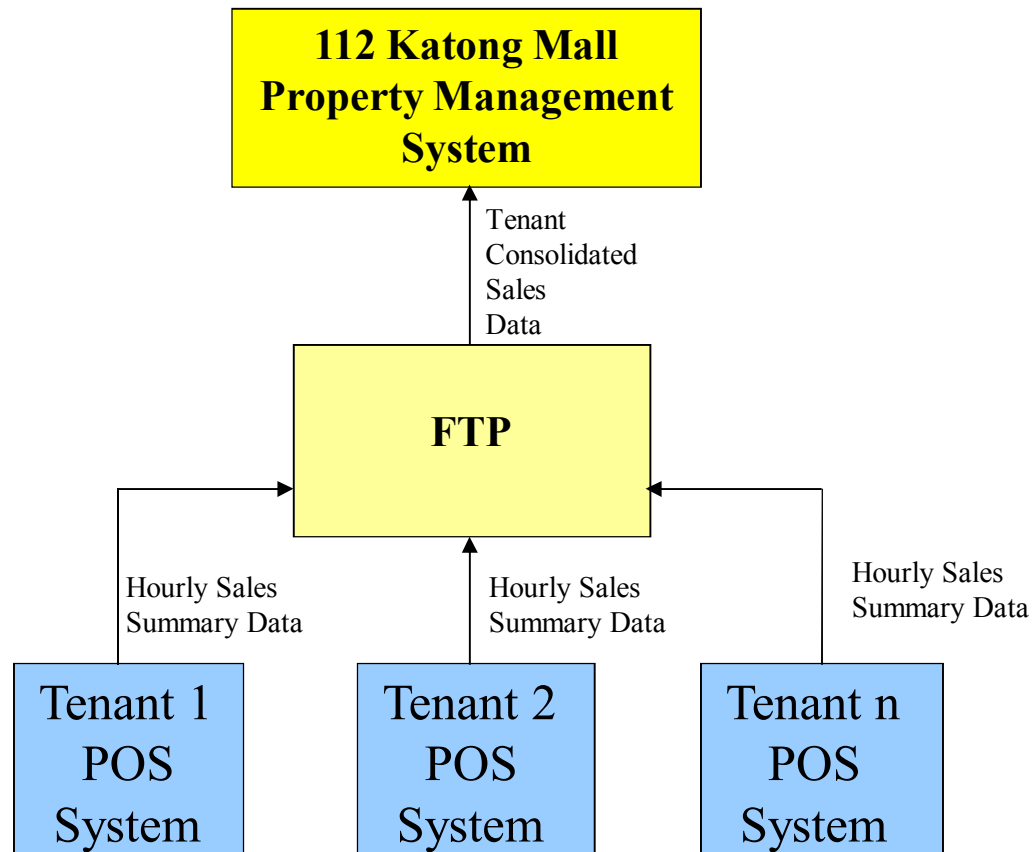

Introduction

The TP Property (MI) System :

- A middleware between the tenant's POS system and 112 Katong Mall Property Management System
- Imports and consolidates tenants' Hourly sales data for rental calculation and marketing analysis purposes.

112 Katong Mall - TP Property (Mall Intelligence)

Data Flow Diagram

112 Katong Mall - TP Property (Mall Intelligence)

Interface Requirement Specification

- Tenant's POS system is required to send sales data to MI daily
- The sales file must conform to the Hourly Sales Summary File format
- One sales file is to be created for each POS per business day.
- For non-24 hours operation, just need to provide the sales information for the operating hours. If there is no sales for that hour, to record with zero (0) for NET_SALES.
- The sales file is to be sent to MI after the end of business day. The cut off time for sending the sales file is 03:00hr the next day.
- The sales file is to be sent from tenant's POS to MI through FTP communication via 112 Katong Mall LAN.

112 Katong Mall - TP Property (Mall Intelligence)

Tenant's POS Pre-requisite

- IP address of the FTP Server, POS and ftp login and password will be provided.
- It is mandatory to have a network card in the POS for file transmission to 112 Katong Mall

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification

- The file naming convention is

haaaaaaaaaaaaaa_ppppppp_xxxx_YYYYMMDDHHMM.txt

where:

h	prefix
aaaaaaaaaaaaa	is the Tenant ID. This Tenant ID is assigned to the tenant by Perennial. <i>Note : A new Tenant ID will be given when the contract is renewed.</i>
pppppp	the POS that generates the sales data (e.g. 1, 02, 123, P015, AAAA, POS789, etc)
xxxx	is the transaction file number starting from 1. Every time a file is generated for the same POS, it should be incremented by 1. This number should be reset to 1 on reaching 9999.
YYYYMMDDHHMM	date and time the file is generated
.txt	file extension

Note :

The file name cannot contain any of the following characters:-

\ / : * " ' |

Example

h101_101_01-01_01_9999_201202221200.txt

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification

More Example

Tenant ID 101_101_01-01 has 2 POSes, POS#01 and POS#02 and it uses both POSes on a particular day. Two (2) files should be generated:

h101_101_01-01_01_9999_200904212200.txt,

h101_101_01-01_02_123_200904212200.txt

The next day, assuming only POS#01 is used, then only 1 file will be generated:

h101_101_01-01_01_1_200904222150.txt

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification ... 2

- The sales file is an ASCII text file.
- The file contains variable records of variable length depending on the operating hours, the general format is as follows:

Data_field_1| Data_field_2|.....|Data_field_n<CR><LF>

For Example

➤ Non-24 Hours Operation (One file)

Business Date: 20111002 and Business Hour: 9am to 2am

Row 1:

```
101_101_01-  
01|01|20111002|13|100|136|36|543.21|I|N|35.54|||-  
0.07|20111002|09:00:00|09:59:59
```

Row 17:

```
101_101_01-  
01|01|20111002|13|170|186|16|107.00|I|N|7.00|||0|2011  
1003|01:00:00|01:59:59
```

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification ... 2

➤ 24 Hours Operation (Two files) (Assuming the end of day is between 2am and 2:59:59am)

1st File: Business Date: 20111003

Row 1:

101_101_01-01|01|20111003|13|187|207|20|123.21|I|N|35.54|||-

0.07|20111003|02:00:00|02:59:59

For all sales transaction after the previous business date end of day

Row 25:

101_101_01-

01|01|20111003|13|370|386|16|107.00|I|N|7.00|||0|20111004|02:00:00|02:59:59

For all sales transaction before the current business date end of day

2nd File: Business Date: 20111004

Row 1:

101_101_01-01|01|20111004|13|187|207|20|543.21|I|N|35.54|||-
0.07|20111004|02:00:00|02:59:59

Row 25:

101_101_01-
01|01|20111004|13|370|386|16|131.00|I|N|7.00|||0|20111005|02:00:00|02:59:59

Therefore the hourly sales for Transaction Date 20111004 between 2am to 2:59:59am is 107.00 + 543.21

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification ... 2

- The field delimiter is the pipe character (“|”).
- The width specified is the maximum width for the field. Actual number of characters stored can be less than the maximum width. Required fields are denoted by an “R” in the “Opt” column. If a field is not a “Required” field, a null value can be provided. A null value is nothing between 2 pipes for any middle field, or nothing between the last pipe and the record terminator for the last field.
- The record is terminated by CR (carriage return, Hex 0D) and LF (line feed, Hex 0A).

112 Katong Mall - TP Property (Mall Intelligence)

Hourly Sales Summary File Format Specification ... 4

Hourly Sales Summary File Format							
S/N	Field Name	Type	Length	Dec	Format	Opt	Remarks
1	TENANT_NO	C	14			R	the Tenant ID, same as the Tenant ID in filename.
2	POS_NO	C	6			R	the POS number
3	SALE_DATE	Date	8		YYYYMMDD	R	the business date where the sales belong to
